

MARS 2017

By mid-2017, the Rockefeller Foundation and intelligence agency planners had passed to Bill Gates their baton as the primary funder and front man for the military/intelligence community's increasingly regular pandemic simulations. In May, the health ministries for the world's wealthiest twenty (G20) nations assembled for the first time, gathering in Berlin to participate in a Joint Exercise Scenario with an imagined China responding to a contagion dubbed MARS, for "Mountain Associated Respiratory Virus." (Mars is also the Roman god of war.) German governmental institutions collaborated to produce the simulation with the Gates Foundation, the Rockefeller Foundation, the World Bank, the WHO, and the Robert Koch Institution (RKI). The ministers hailed from the United States, Russia, India, China, Britain, France, Germany, Canada, Argentina, Brazil, Korea, Mexico, Saudi Arabia, Indonesia, South Africa, Turkey, and the European Union. The

exercises' two moderators also worked closely with the Gates Foundation; David Heymann served simultaneously as chair of the UK's Centre on Global Health Security and as an epidemiologist with the Gatesfunded London School of Hygiene and Tropical Medicine. Heymann also sits with Moderna CEO Stéphane Bancel on the Mérieux Foundation USA Board. BioMérieux is the French company that built the Wuhan lab. Throughout the COVID-19 pandemic, Heymann has chaired the WHO's Scientific Technical Advisory Group for Infectious Hazards. The other moderator of the 2017 simulation was Professor Ilona Kickbusch, a member of Gates's Global Preparedness Monitoring Board. Over two days, the global health ministry officials and other "guest countries and international representatives" bore witness to a "timeline of the unfolding pandemic," known as MARS, a novel respiratory virus, spread from busy markets in a mountainous border region of an unnamed but China-like country—to nations around the globe. Only draconian clampdowns

by neighboring governments and heroic WHO technocrats orchestrating a tightly choreographed centralized global response save humanity from a chaotic dystopian apocalypse. In an hour-long documentary about that event, German journalist Paul Shreyer shows the health ministers intently studying the simulation exercises: “When we look at that picture,” Shreyer says, “we might comprehend a bit better why in today’s crisis, all or at least most of the countries are proceeding very coordinatedly, and why in every country, more or less the same is acted out. . . . They were given the same general recipes and procedural instructions that are now being realized in a synchronized way.

SPARS 2017

Five months later, in October 2017, Gates convened yet another tabletop pandemic at the Johns Hopkins Center for Health Security, the global biosecurity command center.

Gates’s foundation, along with NIAID and NIH, are major funders of the Johns Hopkins

Bloomberg School of Public Health. “SPARS 2017” chronicled an imaginary coronavirus pandemic that would, supposedly, run from 2025 to 2028. The exercise turned out to be an eerily precise predictor of the COVID-19 pandemic exactly three years later. Gates’s working group, which staged the exercise, was a collection of characters with deep connections to intelligence agencies and NIH. They included Luciana Borio, vice president of the CIA’s In-Q-Tel; and Joseph Buccina, director of Intelligence Community Support and B.Next Operations at In-Q-Tel. Prior to joining B.Next, Buccina was a Program Manager for In-Q-Tel’s biotech portfolio, which works with tech startups specializing in enhanced products for the intelligence and defense communities. Matthew Shearer, a Senior Analyst at the Johns Hopkins Center for Health Security and Associate Editor of the peer-reviewed journal Health Security, would discover the first US cases of coronavirus in Seattle in February 2020. Walter Orenstein, MD, is a former surgeon general who

managed CDC's fraudulent efforts to suppress the science linking autism to vaccines, from 1999 to 2004. He left HHS to serve as Deputy Director for Immunization Programs at the Bill & Melinda Gates Foundation, and adviser to WHO. Another Working Group Member was vaccine developer Dr. Gregory Poland, whom the National Institutes of Health has continuously funded since 1991. Building on the Pentagon's anthrax simulation (1999) and the intelligence agency's "Dark Winter" (2001), Atlantic Storm (2003, 2005), Global Mercury (2003), Schwartz's "Lockstep" Scenario Document (2010), and MARS (2017), the Gates-funded SPARS scenario war-gamed a bioterrorist attack that precipitated a global coronavirus epidemic lasting from 2025 to 2028, culminating in coercive mass vaccination of the global population. And, as Gates had promised, the preparations were analogous to "preparing for war." Under the code name "SPARS Pandemic," Gates presided over a sinister summer school for globalists, spooks, and technocrats in

Baltimore. The panelists role-played strategies for co-opting the world's most influential political institutions, subverting democratic governance, and positioning themselves as unelected rulers of the emerging authoritarian regime. They practiced techniques for ruthlessly controlling dissent, expression, and movement, and degrading civil rights, autonomy, and sovereignty. The Gates simulation focused on deploying the usual psyops retinue of propaganda, surveillance, censorship, isolation, and political and social control to manage the pandemic. The official eighty-nine-page summary is a miracle of fortune-telling—an uncannily precise month-by-month prediction of the 2020 COVID-19 pandemic as it actually unfolded. Looked at another way, when it erupted five years later, the 2020 COVID-19 contagion faithfully followed the SPARS blueprint. Practically the only thing Gates and his planners got wrong was the year. Gates's simulation instructs public health officials and other collaborators

in the global vaccine cartel exactly what to expect and how to behave during the upcoming plague. Reading through the eighty-nine pages, it's difficult not to interpret this stunningly prescient document as a planning, signaling, and training exercise for replacing democracy with a new regimen of militarized global medical tyranny. The scenario directs participants to deploy fear-driven propaganda narratives to induce mass psychosis and to direct the public toward unquestioning obedience to the emerging social and economic order. According to the scenario narrative, a so-called "SPARS" coronavirus ignites in the United States in January 2025 (the COVID-19 pandemic began in January 2020). As the WHO declares a global emergency, the federal government contracts a fictional firm that resembles Moderna. Consistent with Gates's seeming preference for diabolical cognomens, the firm is dubbed "CynBio" (Sin-Bio) to develop an innovative vaccine using new "plug-and-play" technology. In the scenario, and now in real

life, Federal health officials invoke the PREP Act to provide vaccine makers liability protection. Another company in this scenario receives an Emergency Use Authorization for a remdesivir-like antiviral named Kalocivir that federal officials previously evaluated as a therapeutic for SARS and MERS. This item seems to predict Dr. Fauci and Bill Gates's aggressive promotion of a failed Ebola drug, remdesivir, during the pandemic as "Standard of Care" for COVID-19. Dr. Fauci helped develop the drug, and Gates has a substantial equity stake in its manufacturer, Gilead. The two men promoted remdesivir during the earlier Ebola and Zika pandemics, despite its stunning inadequacy as a remedy for these ailments. Promotion of remdesivir, and the simultaneous Gates/Fauci orchestrated suppression of ivermectin and hydroxychloroquine, collectively—as we shall see—caused hundreds of thousands of deaths in the United States alone. According to the scenario, by late January, SPARS has spread to every state and forty-two countries.

In record speed, a coalition of ingenious corporate and heroic government officials miraculously produce a new vaccine, “Corovax,” just in time for a July 2026 Emergency Use Authorization rollout. This medical marvel meets resistance from several nuisance groups who complain that the companies have not adequately tested the jab. Among these ingrates are African Americans, alternative medicine enthusiasts, and a rapidly growing members of an anti-vaccination movement who bellyache on social media. But government and industry leaders depicted in those eighty-nine pages have plans to silence and censor these dangerous elements and to crush all resistance. The SPARS team responds with a flood of propaganda to drown doubt with vaccine plugola, public shaming of the vaccine-hesitant, and patriotic appeals. While allies in government and the media boost public acceptance with propaganda, impose censorship, and muzzle dissent, Gates’s minions recruit trusted “interlocutors,”

familiar community and medical leaders, to mollify the public that the experimental, unapproved, hastily tested, zero-liability vaccine is “safe and effective.” The most effective “interlocutor” is Dr. Paul Farmer, Harvard’s esteemed medical anthropologist and cofounder of Partners in Health, which provides medical care to impoverished regions around the globe. The simulation report states: “Paul Farmer, the renowned global health expert . . . lauded the safety and efficacy of Corovax and underscored the dangers of SPARS. His only regret, he said, was that the vaccine could not yet be made available to everyone on the planet.” (The real-life Farmer lists Gates as his organization’s top funding partner.) By springtime 2026, with the EUA vaccine rollout in full swing, public reservations about the vaccine are multiplying. The scenario blueprint predicts waves of severe neurological vaccine injuries soon appearing among children and adults. The CDC is meeting escalating skepticism toward its

exaggerated predictions of coronavirus lethality; official fatality number indicates that coronavirus mortalities are comparable to the seasonal flu: By May 2026, public interest in SPARS had begun to wane. In late April the CDC had publicized an updated case fatality rate estimate, suggesting that SPARS was only fatal in 0.6 percent of cases in the United States. 197 (Note: the 2020 COVID-19 case fatality rate was a mere 0.26 percent according to CDC). The SPARS organizers warn that dropping death rates will spark “public sentiment, widely expressed on social media, that SPARS was not as dangerous as initially thought.” This perilous drop in popular fear jeopardizes the vaccine enterprise. The SPARS team turns to pandemic porn—constantly repeated death counts and case counts—to amplify the panic decibel so as to assure the success of their mass inoculation program. To overcome the public’s dangerous complacency, the CDC and FDA, in concert with other government agencies and their social media experts, begin developing a new

public health propaganda campaign: create a core set of messages that could be shared by all public health and government agencies over the next several months during which time the SPARS vaccine could be introduced. In a section headed “Food for Thought,” the scenario challenges participants to devise their own strategies for disabling common sense so as to achieve broad vaccine coverage: How might federal health authorities avoid people possibly seeing an expedited SPARS vaccine in development and testing process as somehow “rushed” and inherently flawed. . . . How might federal health authorities respond to critics who propose that liability protection for SPARS vaccine manufacturers jeopardizes individual freedom and well-being? . . . What are the potential consequences of health officials over-reassuring the public about the potential risks of a novel SPARS vaccine when long-term effects are not yet known? Even a casual read of the Foundation’s planning document makes clear that Gates’s

preparation has little to do with public health and everything to do with limiting freedom and aggressively marketing vaccines. The planners tell their intended audience—“public health providers and pandemic communicators”—that public concerns over worrisome reactions and vaccine side effects can be drowned out by flooding the airwaves with good news about vaccine successes: The dismaying role of mainstream media in these exercises is to broadcast propaganda, impose censorship, and manufacture consent for oppressive policies. In their projections, the social planners project absolute confidence that news media and social media companies will fully cooperate with this coup d'état. The simulation planners presciently assume their capacity to undermine the Fourth Estate in its role as the gladiatorial champion of free speech and democracy, and their ability to subvert the social media, which once promised to democratize the flow of information. Both mainstream and social media titans, it turns out, are predisposed to

serve globalist elites. Gates and his cronies somehow intuited that these institutions would obligingly shape news coverage so as to manufacture obedience with compulsory vaccination and the dismemberment of the Constitution: In the following months . . . the WHO began developing an enhanced international vaccine program based on the expanded financial support of the United States and other countries. As time passed and more people across the United States were vaccinated, claims of adverse side effects began to emerge. . . . Given the positive reaction to the federal government's response and the fact that the majority of US citizens willing to be vaccinated had already been immunized, the negative publicity surrounding adverse reactions had little effect on nationwide vaccination rates. Gates and his team assure pandemic planners that they will easily avoid culpability for the wave of long-term neurological injuries that they cause by their experimental vaccines: While the federal government appeared to have

appropriately addressed concerns around the acute side effects of Corovax, the long-term, chronic effects of the vaccine were still largely unknown. Nearing the end of 2027, reports of new neurological symptoms began to emerge. After showing no adverse side effects for nearly a year, several vaccine recipients slowly began to experience symptoms such as blurry vision, headaches, and numbness in their extremities. Due to the small number of these cases, the significance of their association with Corovax was never determined. According to organizers, the purpose of Gates's simulation was to prepare "public health communicators" with a step-by-step strategic playbook for the upcoming pandemic. Eighteen months into the COVID-19 pandemic, it is difficult to peruse Gates's detailed 2018 planning document without feeling that we are all being played.
